•
More details on driver elements (gloves, helmet, suit, seat belts colors and details)

•
Optional Carrera Digital Ready NSR cars

•
World Race Endurance 24h

•
New racing parts (light kits, tyre compound and much more)

HIGHEST PERFORMANCE CLASSIC MODEL

The last developed Lola T280/T290 is a mix of history, speed and high technology.

The chassis has been completely re-designed.

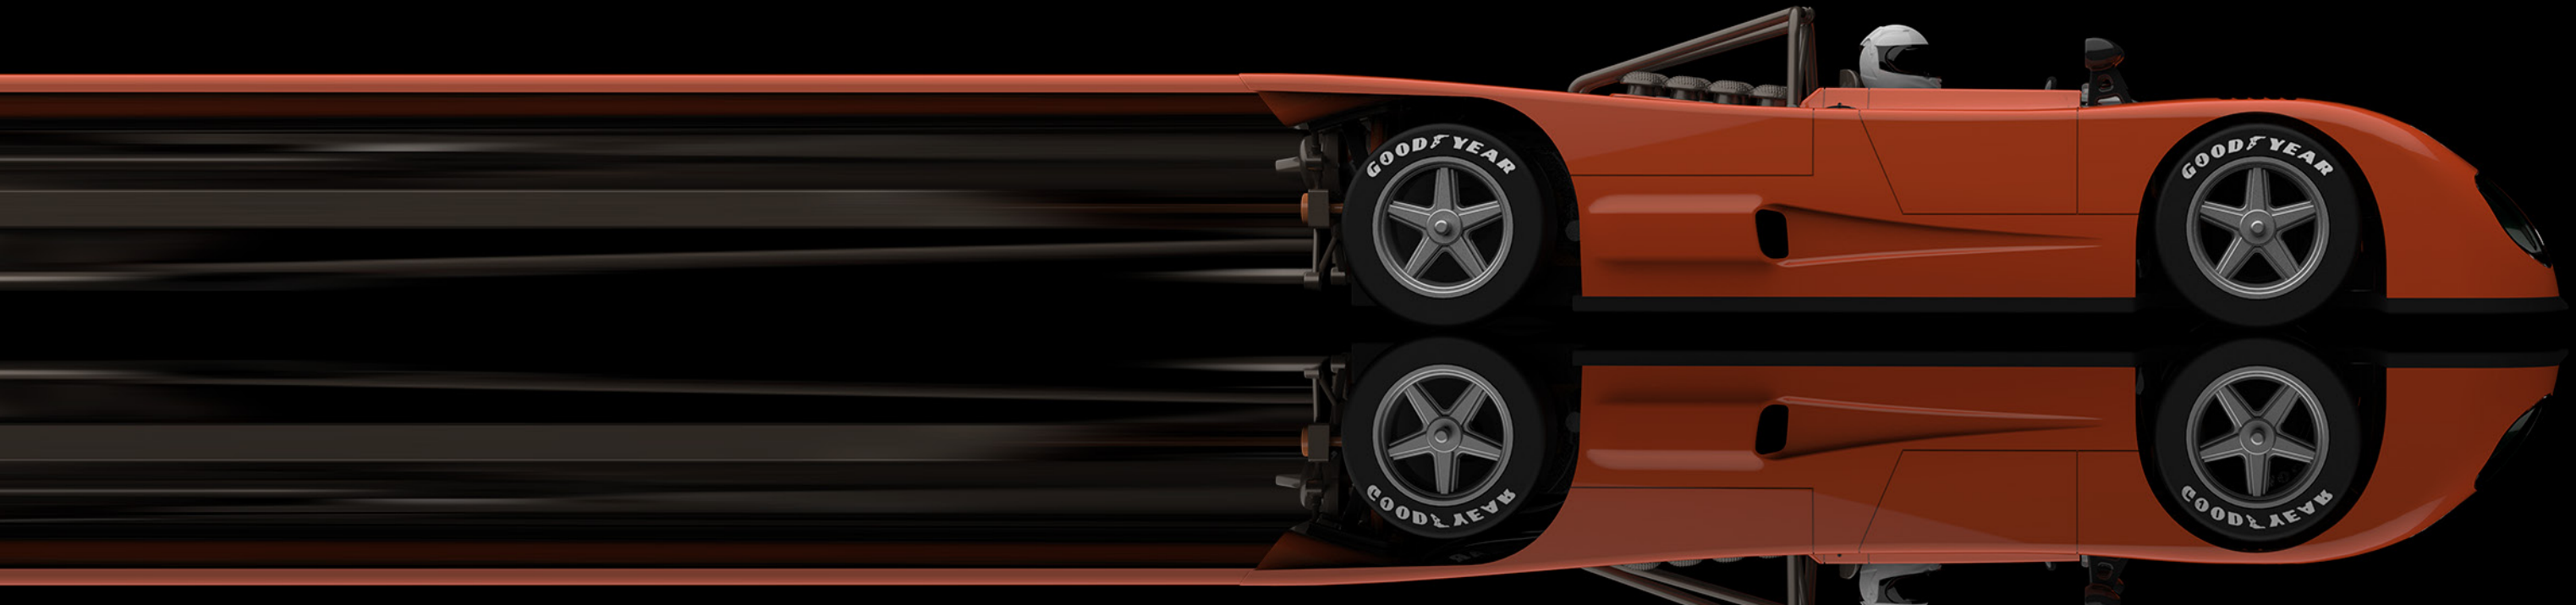

It is now +20% lighter. The rear area guarantee a much smoother work with the motor support, and offers an improved torsional rigidity.

The body has been designed to maximize the COG and the flexibility.

Designed to win the World Race Endurance 24h, the LOLA T280/T290 will be available from February 2024.

GLUING STATION

Gluing and truing the tires offers amazing benefits in terms of performance.

The NSR Gluing station is a easy but well done support to help you gluing your tires.

The station also has 10 supports where you can put your tires before or after gluing phase.

Check the video tutorial about How to glue and true your tires.

NSR DIGITAL CHIP

NSR PROFESSIONAL CHIP FOR CARRERA DIGITAL CIRCUIT

PROFESSIONAL LIGHT KIT

Developed for racing in the World Race Endurance 24h, the ultimate NSR lights kit guarantee is Ready To Race, offers user friendly installation and maintenance and all the necessities racing feature.

- Brake simulation: when the car brakes, the rear stops will be more bright like in the real cars.
- Marshal signal: when the car goes out of the lane all the leds start flashing to take Marshall attention.
- Mechanical micro switch on-off: you can turn the lights off to race the day, and turn them on for the night.
- Cable lenght allows a easy managment of the body.
- Host up to 8 lights.

The standard kit comes with 2 front and 2 rear lights. Buying an extra led kit, the board can host up to 8 lights.
In case of damage, you can easily replace the lights unplugging the broken ones, and plugging the new ones.

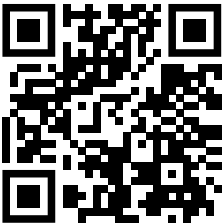

The NSR lights kit is 100% Made in Italy, ready to race and developed to resist in the most important 24h competitions.

Tech datasheet:

- Front lights (white): 3300 lumen
- Rear lights (red): 1000 lumen
- Flashing time (out of lane): 30 seconds
- Front lights color: 18000K
- Power consumption (max): 100 mA
- Cables lenght: 10 cm
- Board dimensions: 10.9 x 23.9 mm
- Board weight 2,4g
- Switch weight 0,7g
- 4 Leds weight: 1,2g

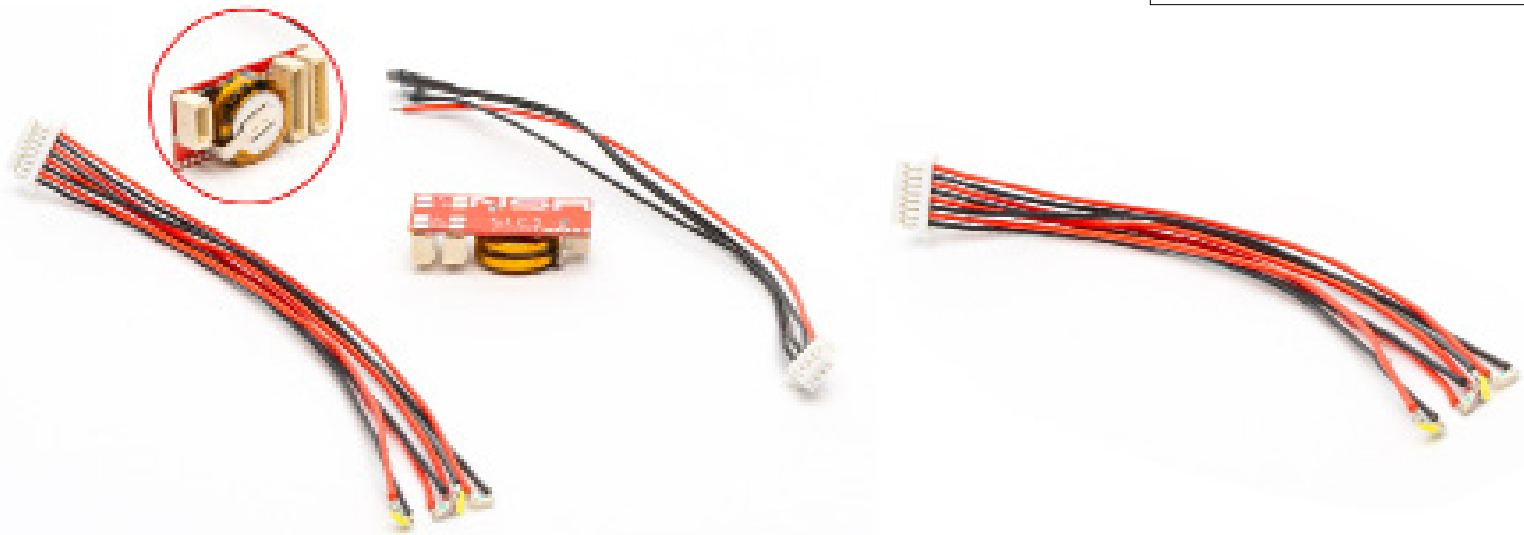

- Lights kit weight (with 4 led) 3,6g*

*excluded switch that must be fixed to the chassis.

NSR

FOR THE NATURE

The climate change we are experiencing is presenting us with tragic scenarios that we cannot remain indifferent to.

NSR is constantly committed to the protection and respect for the environment. The entire energy needs of the company are managed through photovoltaic panels installed on the roof of the facility, producing 100,000 KW of green energy per year.

The machinery inside the facility is state-of-the-art, with low energy consumption and low environmental impact. Most of the components produced are made from recycled plastic, as well as the paper and cardboard used for packaging. The exhaust gases from production are regularly monitored and released into the environment through careful filtering systems to comply with the latest environmental impact and personnel safety standards. Living on this planet is our right; protecting it is our duty!

NSR is an Italian artisan Company making professional slotcars 100% here in Italy, into its factory. New factory opened in mid 2010. It displays over 1.100 square meters; it is a building realised with modern techniques in a total respect of health and environment. It is very comfortable, the walls are totally temperature insulated by aluminium padded panels, all the rooms where fellow workers assemble cars and parts, have controlled temperature by automatic power inverters as well as powerfull aspirators for the welding smoke. There are photovoltaic panels laid on top of the roof to produce over 100.000 KW/year green power energy to totally satisfy our internal power need. Inside the NSR factory we are a team of 24 people, dynamic and motivated, enough to say that the average age it is of 22 years! NSR makes highly performing model cars, a technological concentration of parts to be competitive straight out of the box.

We make professional 1/32 scale Slot Cars and all their related spare parts.

All the Slot Cars we manufacture are equipped with “Ready to Race” technology, meaning they are ready to race straight out of the box.

All our models can race on any type of analog track and are equipped with a dedicated housing to install the chip, allowing them to also race on digital tracks.

Our models are recognized worldwide for the extreme performance they are able to achieve, thanks to the technical quality of the mechanics we design and equip them with.

The entire production process, both for the slot cars and the spare parts, takes place internally within the company using state-of-the-art machinery and highly specialized workers. This allows us to work with very tight tolerance margins on each individual piece, ensuring maximum quality and efficiency on the track.

Each car and spare part is designed and developed through collaboration between the racing department and the research and development department to offer a product at the highest level of efficiency both in terms of performance and technical/mechanical aspects.

At NSR, we strive to represent the excellence of slot cars from every perspective.

The attention to graphic details and the fidelity of our reproductions to the original model make our cars highly valuable models recognized by the collecting world as must-have additions to their collections.

Legends never die

We make collectors editions to celebrate specific cars or drivers that have made history. Despite being collector's items, the cars included in these box sets are ready to race.

WRE

MAY 30TH – JUNE 1ST
CASORIA – ITALY

The WRE (World Race Endurance) is the main event organized by NSR that takes place every year.

It's the 24-hour world championship with drivers from all over the world battling incessantly throughout the event to claim the title.

Classic cars equipped with real lights and racing parts are used for this race.

It's an event in true spirit of competition, adrenaline, racing and fun.
